Vers. 1. Is there not an appointed time to man upon the earth? are think Job consustes that which Elipha's contented to prove that he was punified for his wickednesses by shewing that affliction is common to all men? Others, that he confures that promise, Chap. 5. 20. by shewing, that men cannot look for uninterrupted happinelle here. Ochers, that he confirms what Elipha'z had faid of mans troubles, and feeks to God, as he directed him, that they might fee that he was not unteach able; as Chip. 6. 24. But the right coherence is, that having confuted Bliphaz in the former Chapter, in this he confirms his defire to die, by arguments taken from the condition of man in general, verf. 1; of fome men in special, verf. 2, of himself in particular, verf. 3, and to on to the feventh.

an appointed time] Or, a warfare The word NIL fignifies, fielt, warfare, as I Sam 28, 1. 1(3.40, 2, from thence it is used for an holl; or army, Nehem 9.6. Zeph, 1.5, and then for an appointed time; because there was a fer time for fouldiers to fight, and a fer time also for them to ferve. Therefore the Levites are compared to an hoft and must begin their fervice at thirty years of age, and end it at fifty, Num. 4: 3. So we have a fet time here to grapple with miferies. Others take his fiench of Job in this and the following Chapters, to be an hum-ble acknowledgement of Gods jultiers, and his own finness. But that cannow the largere with the nurtly palligues that follow after-wards; for in the whole book Job feelkes not more against Gods proceedings with him, any where then in those two Chapters; and in fome places to high, as can hardly be mollified by any unforced interpretation. It becomes us therefore not no confound things, but to acknowledge his finful passions, when they appear, and his graces

It likewise crosses the former diffribution, which firews, that God begins to deal with reasonable creatures; at the twelfth verse. They which understand it of the fulls themselves,differ. Some read it, which can remove the mountains. This removing of the mountains, some take to be done in their first creation, when God made hollow places in the earth to lodge the Sca and Waters in, and of the rubbish cast up; made the mountains, Pfal. 104.8. Others take it to be done by earthquakes. And they also differ. Some think it to be by removing them from one place to another, as fome have been in an carthquake, Rev. 6, 144 Others for taking them quite away; which futes well with that that follows; of overturning them. But the removing of them from one place to another, feems to be the meaning of these words; for so the Hibrew word DID signifies; Chap. 14. 18. & 18. 4. Geni I. 8. 8 26. 22. Ifa. 28. 9.

This wavefteemed the beginning of Autumn. The Heb. word UD fignifies. 1. A Moth, Chap.

4.19. 2. Arcturus : As here.
Orion] The Original word 7003 fignifies a Fool fomethates and here it is applied to this flar ; because as fools are inconstant, and one hour in one mind, and another hour in another, fo this star arising in nour in one mind, and another nour in another; to this user among the beginning of December, and beginning the Witners, produced much variety of weather. Hence also one of the months tatch in another in Hence, also one of the months tatch in another in Hence, Zecht, r. because it produced the directly of weather; which some which some which to be November; others, December, in which this which the second to the contract of the second to the secon ftar arileth, Butthey (as most agree) beginning their moneths in the midt of outs, it may well agree with the ariting of this flat, and the beginning of Winter. Orion is a Greek word, and comes from a verb, that fignifies to fir or trouble; because this flar troubles the air, and men alfo, by bringing alterations of weather, by his great in-

ar, and mentalists of states and are a conflared.

Pleiades] The native figuilication of the Hebrew word is not to be found among the Jewish Writeers; Bus it appears to be the leven stars called Pleiades, arting in the beginning of March, and giving the beginning to the Epping, because it is fet here between those flare that begin the Winter, and those three begins the Summer; and Chipe that begin the Summer; and Chipe that begin the Summer and Chipe that begins the Summer and Chipe the Summer and 38. 31. it is opposed to Orion, that by his frosty bands binds upthe earth, and it on the contrary less it at liberty to bring forth delicate fruits. The Greek word Pleiades here uled in our Translations is taken and is mell; from a word, that fignifies to fail, because after the rough Winter p.ft, in the beginning of the Spring, failers ule to

put forth to fe. Chambers of the South] Hereby is, fome think, meant those starts which are hidden from us, who live under the North Pole, and are feen by them, who live under the North Pole, and are feen by them, who live under the South Pole. And that they are called Chamber the South Pole. And that they are called Chamber the South Pole. led Chambers, because they are hidden from us in this part of the world, as it they were lodged in feeret chambers; Prov. 7.27, 102, 15.

1. Cant. 3. 4. The Chaldee Paraphraft reads it, The chambers of the flars, the confellation of the planets in the South part. And that he names not those stars, because they are hidden from us, though they appear to other parts of the world, as the former do to us. But it my, probably be decimed, that he rather means those flars that arise about the means those flars that arise about the same of the same the s

the beginning of Summer, in the heat of the year, as if they came then , Chap, i. 14, &c. And it may be Tob might aim at that, for inturalout of certain Southern chambers, or closers; as the Dog-flir, and others. He intimates that God orders all feafons, and motions of the ftars, including the reft under thefe by a figure of the part for the whole. There being the fame reason of all s and that being too great a work for man to do, sets our Gods omnissience, and omnipotency. This verse shows, that the godly men in those times had much skill in Aftronomy and Aftrology: though they did not abuse that skill to the predictions of future events; as fome now do : but used its to con-

He hath all advantages against me, and the refore I must needs becaft; though I could fay much for my felf, if I were upon equal terms with him. V. 12. Behold, he taketh away, who can hinder him? Who will far unig bim, what doeft thou? I in this veries and the next, Job thews mans great weakness, that if God thould take away all he hub, be it defervedly or no, yet he cannot hinder him, nor dare not ask a reason of it, nor cannot look to have help from any friend; because Gods pow er is fo great, that he would confound the stoutest, that should take part with any, whom he spoiles. All tends to this purpose, that Joh in this discontented passion he was now in, perswaded himselfe that God would overpower him, and not give him a just hearing. Not that he shought he was no finner, or had deferved no corrections but that he was not fo great a finner, as to be made an example of Gods anger to present and future ages, by so great judgements infil &ed upon h m; contrary to Gods proceedings in those times, wherein God used to prosper the godly, and offlict the wicked most grievously: We find the Plalmist subject to the like tentation, Plal. 73, Jer.

Behold] See on Chap. 1, 12. Or, If; as Jer. 2, 10. 2 Chr. 7. 13. Oraif it be Behold, yet the verfe may be read conditionally; as often in Scripture, where two things, one depending on another, come to guke; a condition is implyed in the fift, as lis. 8. 10. Take coun-tel together, and it shall come to nought: which is not an injunction to do fo, but a prediction, that if they did so, it should be to no purpole, for God would hinder it. And this agrees with what followes here; for if is added in the beginning of the next verle. See the like

femences, Pal, 109, 28, Mal. 1, 4.
he taketh away] The word fignifieth a fudder and violent taking away, as wild beafts or robbers do their prey, without any order of law. The word is used no where esse in Scripture, but here, and Prov-23. 28. And therefore the one place must give light to the other. So Christs coming is likened to the coming of a thiel, 1 Thesis, 2. But there is more intended here ; for Job in his passion casts some aspersions, of some kind of injustice upon God. Else why doth Elihu, in his long speech, and God in his, towards the end of the book, charge Job with such a fault, and eleer Gods Justice exceedingly? which shews, that Job had taxed God unjuftly; and if any were, certainly most in this, and the next Chapter. The speech is somewhat concise, and flort, as Rabbi Levi observes on the place, and may be filled up thus; Behold he spoils a man when he will, and none can be found, that en hinder him from so doing. Some understand it of taking a-may a mans goods or possessions from him, as he had done Jobs,

ly we are too ready to repine at our own loffes, Others, of taking ly we are too ready to repine at our own lottes. Others, or caking away life; which lob might well expect in fuch milderes. And for the Chaldee Paraphraft reads it, Behold he will take a man out of the world, and who will there be, that can bring him back? Job's theaming is in general, that whereas a man spoiled by ochers, may some way be helped, none can help those whom God will spoile.

Thus an utter destruction in scripiture is fet out, under the similitude of one falling under a burden irrecovera-bly, Pf31, 38. 4,5,6 Hab. 3,6. Judg, 27. Others interpret these three last veries, as if Job ipike reverently of Gods works, which none could fufficiently understand, or refift, and therefore he would humble himfelf before him. Bur what makes all this to Jobs fcope, who flewes It le liumility no where, nor f cake more firangely of Gods proceedings with him any where, then in this Chapter? V. 2. I will say unto God, Do not condemn me ; shew me wherefore then contendest with me] Job in these words, looks upon himself, as a man condemned without triall, because he was cast into such miseries and fubject to fuch centures of others, as men juftly condemned use to be. And knowing no caufe, why he fhould thus be dealt withall like an hypocrite, he defires God not to use his absolute power in condemning him, but to let him know the true cause of his miseries. V. 11. Doth not the eare try words, and the mouth taste his meat? The intent of Job in these words is, that the truth of the thing in controversie between him and his friends might eatily be known, if men would but examine the things that were fooken on both fides by himfelf, and by his friends. For there is as fure a way to judge of trut and falthood by the ear, as there is of judging of pleafant and bitter

things by rate. See the like, Chap. 6, 30. & 34. 3.

to the Almighty] For this name of God, fee Chap. 5. 17. & 6. 4. 14. & 8. 3, 5. & 11. 7. Some understand it of pleading before God, as a Judge between him, and his friends, because they would excute Tob as much as they could. But it appears by many Arguments, that Job intended to plead with God, as with a party that had dealt too hardly with him, and countenanced his friends against him. For 1. He ceftres not to speak to his friends in Gods presence, but to the Almighty. 2. He desires to speak by way of reasoning with God himself; not with them before God. 3. His plea afterwards proves it. his a maintaining of his own caufe, ver. 15. And he pleads directly with God; not with his friends before God, verfes 21, 22, 23, 24.

forgers] So it is translated, but the word 700, never fignifies fo, but WITH, is used for to invent lyes, as a workman frames a building. The word is used but twice more in Scripture, and it fignifics fawing, whereby one piece of cloth is fowed to another; as Chap. 14. 17. Sometake it as an acculation of his friends, that they had asit were fowed one lye to another to diffrace him, that is had multiplyed many lyes against him. Here it is used in the fecond fenfe, for they were not profest Physicians; Neither did Job look for cure of his body from them, but comfort for his foul, which yet they would not afford him, but rather discouraged him.

V. 5. O that you would altogether hold your peace, and it shuldbe your wifdem. I Job finding no comfort in the words of his friends but much discouragement, persyades them, in this verse, to fave a labur, and be filent; and in the next, to g ve him audience, thatthey

By an Actiphrasis or contrariety, (which is frequent in the Hebrew tongues for the same word to figuisfic contrariets for want of compounds, where by they are let out in Greek and Latine) it fignifies to fay or do nohing, to be did or filent, as Gen. 34, 5. And fo it is taken here. The doubling of the word in the Original, addes to the fignification; as dying the death, Gen. 2, 17. V. 7. Art thou the first man that was born ? or wast thou made before the hills? These words seem to take their rise from Job's words, Chap. 1.12. wherein he did tackly intimate, that he thought himself wifer then they, because he was elder. This is with much choler objected to him here by Eliphaz; asif he had faid, Thou dost arro-gate wildom to thy felf; as if thou hadst been the first man in the orld, and by observation of all occurrences, ever since the creation, hadft gotten fingular wildom to thy felf; fo that thou needest not to be raught by any other, but all others had need to learn of thee. Thus in an ironical way he goes on to deride Job in this verse, and the next,

before the hills] A proverbial fpeech, to fet our antiquity, or rather eternity; for the hills were made at the beginning of the world, and in likelyhood appeared out of the Chaos before other parts of the earth; and he that was before the world, must be erernall. Hills being lasting creatures, are used to set out eternity. So much this phrase im ports, Prov. 8 25. Pfal. 90.2. And so much is incimated in the next serie. It is as much as if Eliphaz had faid, Dost thou think that thou wast before all men, and knowest more then any man, becaule of thine age ? or doft thou think yet more highly of thy felf that thou wast from eternity, and knowest as much as God? These are vain thoughts in thee. With the fame argument God bears down the pride of Job, in the beginning of his speech to him, Chap. 28 4, &c.

And they tead it, There is a gray-headed man a nong us , (meaning himfeit) and a very agedman, (meaning Bildud) So runs the Childee Paraphrate. But that is doubtfull, as appears by the notes there, And the Chal-dee Paraphrafe makes Zophar elder then Jobs father. It may be meane fimply. There are ancienter men then thy father now alive, and not in other Countries onely, but in ours, of whom we have learned what we speak, and find them to be of our mind. V. 11. Are the confolations of God small with thee? is there any fecret thing with thee? Here Jobs friends go on in an ironicall way to deride and vilific Job, as one that thought too highly of himself, and too meanly of them, and that in this verfe, and the two verfes following. He proves it by an effect of this pride, in the beginning of this verie, contempt of divine confolation. Which is fet out by the caufe ofit ; in the end of this verfe , and in the 12. verfe , to wit, blindnesse of mind, and impotencie arising either out of 100 much confidence in himfelf, or too deep tenfe of his miferies. But this was far from Bliphaz his scope, who endeavoured not to comfore Job, but to discourage him. It is rather to be understood of those comfortable promises that Eliphaz, and his companions, had given to Job in their former diff pute with him, promiting him from God much future prosperity, if he did repent. Others read it, the confolations of these men. Meaning the two last that had spoken, and in modelly saying nothing of himfelf. and have not hid it] From their posterity, but fai hfully communicated it to them, as their fathers had done to them, that it might not perith. For it is likely, that no Scripture was written in Jobs time, but God appeared in some eminent men, and revealed his Will Due God appeared in Joine comment many and revenue in view as othern, and they raught it list infully to their optierity. But now the hath written his mind fully in his Word, and therefore there is no meed of traditions. This doubling the phrafe, in other words, is for the greater certainty of the truth of it, Joh. 3, 20. See un Chap. 14. 10, 11. The word 7173 fignifies to hide a thing, fo as it may not be Aten, or heard, or appear, 2 Sam. 18. 13. 2. To be cut off: for things cut off can appear no more, Exod. 9.15. Here it is taken in the fire lenfe, for hiding. They revealed it, that it might not be loft by

V. 19. Unto whom alone the earth was given, and no stranger paffed among them] Here he gives Job a ground to give credit to what he flould fay, if not for his lake, yet for those worthy mens, from whom thefe excellent inftructions came, being men, not driven up and whom their excellent initructions came, being mension given up and down, as wicked and ungodly men are, by Gods judgements, but men ferled quietly in their hibitations, and living plentifully, yea, coming to authority in their Country, and by Gods bliffing, keeping oft all enemies, and to being examples of the cominued prosperity of effodly men, which they held out in words, and therefore worthy to be believed.

V. 10. The wicked man travelleth with pain all his dayes, and the number of years is hidden to the oppressor. Now he shews whit were those wite sentences, so much commended by him, which he received from those samous men, and at what he principally aimed. Ha fets out to the end of the Chipter, the curfe and destruction of wicked men, how that even in prosperity they live alwaies miserably, expecting a change, and what they fear comes upon them, and then they defpair having no hope of eleaping, but it is far otherwise with godlie men. The same things he had spoken before, Chip. 4. & 1. but here he delivers them with great varietie of phrases and figures which is very delightful. He fees out the milerie of ungodly men by their pains, in this verfe, their fears, ver. 21. 22. their wants, ver. 23. their troubles, verfe, 24, the causes of all these miseries, ver. 25, 26, 37. of the Chapter. All or most of these things, he conceives had befallen Job, because he confessed such things were come upon him, Chip. 17. 13,14. & 3. 25, 26. which things are threatned by God, against ungodly men, Levit. 26, 36. It comes from a word that fignifies to fear, and notes out fuch men, as by reason of their power and cruelty, make others afraid of them. Others read the latter end of the verie thus, And in the number of years, which is hidden to the oppressor. And then it is the same in sense with the former, onely it is delivered in other words, for emphalis sake, It is certain, he shall have trouble all his life loag. Secon Chip. 14, 10, 11, Others read it thus, And soon numbred years, are stored up for the Tyrant. That is, God in his secret decree, but appointed him but a short time to live. CHAP, XIX,

Vers. 1. Hen Job answered and said In this Chapter Job I moves his triends to pitte him with fuch pationate expressions as might move stonic hearts. He acknowledgeth, that not onely those mileries Bildad spake of, but also many others lay foreupon him. And that they came not by chince; but by Gods appointment. Yet he shows, that he should not therefore be account. ed a wicked man, nor be to reproachfully dealt withall by his friends, but rather be pitied fo much the more, by how much the greater his affliction was. And hoping to find but little comfort from his friends, he plainly declares, that although he looked for no reflication to prosperitie here, yet he expected a glorious resurrection hereafter. The parts of the chapter are four. 1. A preface to verse 4. 2, a Pathetical perswasion of his friends to commisseration. From thence to ver. 23. 3. a clear testimony of the resurrection. From verf. 22. to verf. 28. 4. 4 perswasion of his friends to repentance. From thence to the end of war any remaining Either the meaning is that all his family and the Chapter. Have pity upon me, have pity upon me, O ye my friend; for the hand of God hath rouched me] Here Job goes on from a lamentable description of his troublesto a pathetical infinuation to his friends that he expects, that they having weighed all the particulars, flould rather pity him, then so surjoy weighed an interaction fould rather pity him, then so surjoy prosecute him. This he pressent with a double argument, one in this verse from those great plagues, which God had laid upon him, which might suffice, and need not be aggravated by their unkindnesse; the other from his low condition in the next verfe who had no flesh left, and therefore had little need to be further perfecuted. And Kimchi in his preface to the small prophers gives this as a reason, why they were all twelve bound rogether in a book, lest by reason of the smallnesse of them any one of them flould be loft. Job would have none of his precious words to be left. Allo he with: s them in a book that they might home to many mens knowledge, that could not hear him speak them, nor perhaps might never hear of them by report.

V. 14. That they were graven with an Iron pen, and lead, in the and to be graven in a rock is more then to be written in a book. Hereby Job shews, that as he feared not the judgement of all then alive, to not of pofferity neither, who use to judge more freely and impartially of things, when fear and favour of the persons is gone with them. As if he had did, I could be content my words were written in a book, but I wish rather they had a more lasting monument. Moths and age can corrupt books. I would therefore have an iron pen and a leaden book that may ft ind out all the injury of time, and pre-fewe this restimony of the resurrection, to the resurrection. This he propounds in this verleand the next, amplifies from thence unto the last verle and concludes all in the last verse. In the proposition he appeals to Jobs consciince by way of interrogation in this verfe, and fets down the thing to beproved in particular in the next verle. He fecretly taxes Job of grois ignorance, or wilful opposition of the truth. And to Broughton reads it, Haft thou marked the way of the old world? It was sufficient to mention this Deluge being fresh in memory, whereby it appears that Job lived before the deliverance out of Egypt, becufe he mentions the creation, and the flood, but not that deliverance, which had he known i would have afforded him an excellent argument to prove that godly men might be in great affliction, as the liraclites were in Egypt, and his friends a plaufible argument, that God uceth to destroy wicked men for their finsas he did the Egyptims in the red Ses. Bliphaz his argument from the Flood ftands thus, God did then destroy all those ungodly men of the old world for their wicked courses. Therefore though he be in heaven, yet he takes notice of mens fins here to punish them.

V. 14. And he called the name of the first. Iemima, and the name of the feend, Kerenhappiech The names of Jobs daughters are fer down in this verfe, their beauty, and in-heritance in the next, Their names are fer down 1. To shew the truth of the history, 2. To take occasion to commend their beauty. 3. Because their names are lost in marriage, whereas the names of fons remain. Hence the male 711 hath his name from remembrance in the original. The females \(\sigma \) will from forgetfulneste. These names imposed by Job, may have relation to the beauty of his daughters; which being one of the excellencies of nature, and ins unugners; which ocing one of the excellences of nature, and of more part of Gods image, and a thing much looked upon in women, and accounted the partion of maids, he thought fit to fet out their names. The fifth had her name from the day to flow the their names, the fifth had not name from the day to flow the brightnesse of her beauty. The second from a most precions and sweet smelling spice, to show, what great account would be made of her comelinesse. The third from the horn, wherein proud per-Ions used to put their colouring stuffe to make them beautiful, in-timating that she was more beautiful by nature, than they by all their art. These names also may have relation to Jobs former mifery, and present delivery to nourish thankfulnesse in him. The name of the first may be opposed to his former darknesse, or trouble (now taken away) of which he complains chap, 19, 8. The fe-cond oppoled to his former corruption, and stench of his wounds (now healed) of which he complains ch.7.5. The third opposed to his former weeping and flurried countenance (now made clean and fair) of which he complains, ch 16 16. The Author of this book (the immediate and secondary we mean besides the original and general of all true Scriptures the Holy Ghost : See of the Psalms particularly, Mar. 12.36. ASt. 1.16. & 4.25.) though named in some other places of Scripture; David; as Luke 20, 42, andel sewhere; is not here in the title of the book expressed. The truth is, they are us all Davids Plalms, some having been made before, and some long after him; as shall be shewed in due place. Neither is that to be trussed to, as a general rule, that those onely are Davids, that bear his name in the title or beginning, since (besides other reasons) we find some in other places of Scripture directly ascribed to David, which have not bis name press-ch; as Plal. 2. Act. 4.25. However, to make good this title and inscription; it is enough that the greater pare were made by David, and others by him (as is generally believed) collected into one, and appointed or fitted for publick use,
Of the excellenct of this book, by a divine hand, nay by the immediate hand of God himself, as we may suy, so wonder-

fully countived and fitted for all mens occasions, whether in adversity, or prosperity of what degree or condition sever they be (a thing so known, and acknowledged by all, that have made any trial) we shall not need to speak: But never was great er injury done to any book of Scripture, than hathbeen done to this by one Bonaventure, who substituting the word Mary or Lady, instead of Lord, or God, in most places, with some other atterations, (in some more, in some lesse) hash made them all appliable, or rather hash attually applied and ir ansferred them to the Virgin Mary. As for example, he makes the sirst Pfalm to begin, Bleffed is the man that loves your name, ô Virgin Mary; your grace shall comfort him. The Gyenth, O glorious Lady, I have put my truft in you: I befeech you deliver my foul from the hands of mine enemics. What hash been here cited, is taken out of the kinch translation, primed at Paris, 1607. The Original Latin is extant in Kemnicius his Examen.

The use of the Psalms (common and practical) is twosold: Either for a daily exercise of devotion, and divine worship whether private or publick; (therefore associated Prayers, as before noted:) or for particular occasions and occurrences,

whether private or publick, according to the subject and argument of every Pfalm

necessor produce or possive, measures, we in payee and argument of every 1 fain.

For the first, that the Psalms (not to speak of bals longs and hymnes, long before David used upon extraordinary occupions, as we find recorded in the Scriptures;) as they were partly composed, and partly collected and put together by Davids that end 3 so were ever since Davids time used as part of Gods publick, service among the sewes, is not questioned by an. And that this rafe of them did continue among Christians since the sirst Plantation of Christianity in the world, way appear by the most ancient records and monuments of those times that remain unto this day. As for private devotion, though we will not condemn the use of other late books and h. And as we give the preeminance to the Pfalms; so after the Pfalms to those Books of private Devotion, above all others, that are mounted when the Pfalms specially, sind go along with them, or take them along; as I have seen some. Now for this use, whether publick, or Product the reading of the P falms in order, as commonly digested, by certain portions, as 'tis most ordinary; so, except there be extraordinary occasion, it is most prositable.

The second use, we said, was upon especial occasions and occurrences, such as this life doth afford many, both publick and pivate, according to the particular subject and argument of every Psalm. Now because such occasions as we said but now, are very frequent, and that all men are not so well versed in the Psalms; or though well versed, have not that judgement, as walfernof themselves what Psalm is sit and proper for every particular occasion, wherein neverthelesse the chief associate Psalms dosh mannly equisit many devisions have been by divers, both ancient and late, and divers. Tables set out to that Purpose, representing the Psalms digested according to their several subjects and arguments. The most ancient Table now extant in that kind is that of Athanassus, an ancient Greek Father; and though divers have been set out by others since himset I know not any that have been more copious and accurate in that kind than he, as may appear to them that shall peruse him. But of all those Tables in general, it must be considered; First, that difference of translations, as it must needs remainment, may an every tweeten general, may or conjugared, evir, that appeared of traillations, where the bread aver for f Expositions, so some deversity of applications too, to particular occasions. Neither it this diversity observable in ancient translations only, compared with modern; but even in, and among later translations also, So, for example, in some Tables of that kind, that have been set out by some learned men, we are sent to the 41. I salm, to learn that we should not judge rashly and uncharisably of the just and righteous, when he falleth into troubles and adversities. There indeed, according to the translation and exposition which we embrace in these Notes, we shall find a notable lesson to that purpose, as may be feen there : but according to some other both translations and and expositions (Blessed is he that considered the may or just in the poor, or entirely to import relief and succour onely:) little or nothing to that purpose. Secondly, it must be consider poor of the Argument of many P falms is mixt and various fo that the fame P falm may be reduced to feveral sitles, according to its feveral pars; sas Petitory, Deprecatory, Imprecatory, Euchariftical, of the like: So that it is no wonder if all aing to its jeveral parsons to chief y all processors y particles and pecanic that according to wariety of tempers, phantages, and Tables do not agree in their indications. For their reasons, and because that according to wariety of tempers, phantages, and capacities some over man that is abla, with diligent reading capacities some over man that is abla, with diligent reading capacaies, joine men are twee sing, there being store to fit all to make such a Table for his own particular net, to which ho and digesting of the said P salms, there being store to fit all to make such a Table for his own particular net, to which ho may have recourse upon occasion, and not be deceived of his expetitation, as haply he may sometimes, if he trust to common Tables, However, for the help and direction of them that are not so able of themselves, we have here set down some sem generals of most common use to which divers P salms may be referred. That goddinesse is profitable unto all things, paying the promises both of this life and of that which is to come, I Tim. 4.8. Yet is not this the happinesse or prosperity principally re intended ; but that which is permanent and eternal. To which allo, not reason only, but the very words, if well pondered and examined do lead us. For what is the greatest prosperity that this world doth afford, or the longest life of man, or what account to be made cond into district to infect in the scripture, as of graffe, and the flower of the fidd, Ela, 40 6, which in the morning flourishesh and groweth up; in the wening is cut down and withereth, Plal, 90.6, See also Plal, 103, 15, 16. and what account David himfelf made of it, appeareth Pfal. 39.5,6. & Pfal. 62. 9, which even they, who because they had no certain knowledge of any better after this had most reason to make the most of this prefent world, and the goods of it, have freely acknowledged and expelled in many pithy fentences and speeches, comparing all buman felicity to a shadow, to a dream, to a bubble, &c. So noted and incurrent into the eyes of all wise men hath this truth ever been, This fense therefore, as principally intended, and most proper to the place, we shall henceforth infift upon, in the following

V. 4. The ungodly are not fo] Here by the word ungodly, must be understood the finners and fearners also, mentioned in the first verse; whence some would infer, that there also by those three different whence tome would meet that there who of those words, the fame must be understood, because all are comprehended here under one. But that is not necessary for it is ordinary enough, as to other Authors, to to the Scriptures, to afe one and the fame word, o other Author, to the Scriptures to ale one and the same word, (ometimes in one and the fame verse,) in different senses, So, the debrew word CDP PSal, 104, 14, is taken, and so translated, for word; a general word; and in the very next verse, translated bread; as bread is taken in its proper fense. So the word roud, Law, Rom. 1, 2. &c. is taken in different fenfes : fometimes more generally, and fomerimes more particularly. However, I am nor against it, (as was faid there,) that the fame men by those three several words in the first verse, (if any like it better so) should be understood. See Ifo upon Pial, 26, 4. And Kings shall be the nursing fathers; and their Lucens the nursing mothers: they shall bow down to thee with their face towards the earth, and liebe up the dust of thy feet, and thou shall know that I am the Lord. This was fulfilled in the mitaculous conversion of fo many Gentile Kings and Emperours to the Christian faith, whereof we read in Ecclefiaffical Hiftory, However, this hapned not presently but after many bloody persecutions; many plots and proects contrived with all possible human subtilty, for the destruction of Christians. Out of the much of habes and fuelding: J The common opinion is, that David doth here fet out the wonderful providence of God toward Infants, in their bit it and fultentation, and particularly,in providing fuch convenient food for them, as milk, and convey ing it to them lo fitly, and fitting them by lecret infinits and dil politions of nature for it, and the like: Which things, indeed, if wel and rationally confidered, are very wonderful, and afford matter o high contemplation to a Naturalist; as may be seen by them that have written of those particulars, Philosophers, and others. See upon Pfal. 22.9, that took me out of the womb. See alfo, Pfal. 139.13,14,&c. & Pfal, 22.9, 10. Pfal, 71.5,6. Neverthelefs, this being no common Subject for every ordinary mans speculation or observation; nor of nuper for every orannary mans speculation or observation; nor of itelf fo far above and beyond the ordinary course of Natures wonders in natural things; those specially, that belong unto the nature and structure of man in general, whether his body or foul be considered. dered: That David would pitch upon this one particular of Infants, as the most eminent and conspicuous of Gods wonderful works, to flop the mouths of blasphemous atheifts, doth not feem to be very probable. The heathens I am fure (whose testimony in this case i very confiderable) in their writings upon this fubject, unanimoufly acknowledge the fight and contemplation of the Heavens, Sur and Moon, &c. fo open and obvious unto every ordinary man, that bath any thing of common sense and reason in him, to be the thing if not the onely, yet the chief and principal, that hath compelled the most obstinate and obdurate to an acknowledgement of a Deity And fo David himself, Plal. 19. The Heavens declare the glory of God Re, and Plal, 89, 5. The heavens flull praife 1 and 97.6. The heavens delare. That therefore which I shall propose to the further conferration of the learned, is, whether these words, babes and furklings here, might not be taken proverbially, for things that have no voice, breamot speak; it being so proper to, and observable in Infants, that they do not speak, that from that very thing they have their names in the Latine tongue; infans, properly fignifying one that tannot speak; and infantia, disability to speak. And is not this the very thing that David doth in that other Pfalm of the fame subject as this, more plainly, in words; but with the same acuteness of sence, infilt upon, That the heavens, though they have no speech, nor lan grage, nor voice, (for all those words are there, ver. 3. as shall be Rewed there) yet they have power enough to fpeak and preach their Maker all the world over? Neither can it be any material ob-redion against this interpretation, that Christ doth apply these words to children, that were very children, nor figuratively so, Mar. 21.16. For besides that there be examples, divers: of more remote applications in the New Testament: is apparent, that the propriety of words may not be pressed in this particular, fince that Christ there applieth them to children (though fuch otherwise as might becalled infants well enough; as the word even by profane Authors is used sometimes) that actualy did socak : whereas here, such as cannot speak, (wherein is the chiefest emphasis, or dinosis, as they call it) are properly intended. Yet was Christ his application of the words very proper and natural, according to the proper nature of fuch applications; which fometimes are but bare allusions,

as it were ; and yet fuch allusions, as out of all question, were event from the beginning fo fore-cast and appointed, as it were by the Holy Ghoft.

By night, the Moon and the Stars are feen, mentioned by themselves. This I take to be sufficient and satisfactory, fo that we shall not need to mention multiplicity of reaions that have been devised by Interpreters, why the Sun, the most glorious of all, is here left our among the works of God, which I conceive to be but their mistake. Not for his use onely, to enjoy here-after when transferred thither after death; (which some would have chiefly intended) but for his use now living; for the contentment of his contemplation, and for the benefits which he receiveth from them; not light onely, but the feafons of the year, and the fruits of the earth, which without the heavenly influences could produce no-thing. And so much some of the heathen have acknowledged, and from thence well inferred both the goodness of God, and the worthinefle of man, above other creatures. this me, of Gods hiding, expressed in all the Scripture: included in the reciprocal verb, I finde it in one place: Efa. 45.15. Verily thou art a God that hideft thy felf, O God of Ifrael the Saviour. But the hiding there intended, is not the same as is here spoken of, of God his not affording himself to the reliefe of his people in time of trouble and perfecution; but of his wayes and counfels, both in his general administrations, and particular judgements, for the most part, impenetrable, and incomprehensible to mortal man: as we are raught, Rom. 11. 33, 34. Pfal. 77. last verse, and elsewhere. And this to be the meaning of the Prophet in this place, besides other reasons may appear by ver. 9, 10, of the Ch. Wo unto bim that firiveth, &c. Saturnue, one of the ancientest Heathen gods, had his name from thence: from Sater, I meane, to hide; as all learned men agree. And why not from this very kind of hiding, here spoken of the Prophet; as well as divers other particulars of their Mythology from other Scriptures, of which no question is made? Heathen Mythologifts, I know, tell us of another kinde of hiding, be-longing to this supposed Deity; as their manner is, when long ioning to this supported Delvy, as that mainter in the and prevailing superfictions, had obliterated original truths. There is good use to be made of such observations: neither do I remember to have met with it elsewhere. But no the Pfalmist here:

Then haft not forfaken them that feek thee and elfewhere very frequently : why may not after God, here allo, though not expressed, be supplied in the translation ? He no great reason but it may. Yet some Interpreters of best ac-ount, are much against it, and call it (somewhat too rigidly by which favour) a deprayation of the sence. For, say they, by this general word, will not seek, or consider; David doth here point at the original cause of all wickedness and impiety; which is, want of due confideration. And that is very true; For if men (as would well become rational creatures to do) would take time, and make and ferioufly to confider with themselves; first in general, what is the end of man, as endowed with a rational and immortal foul: and then of particular actions, how they conduce more or leffe, or how contrary to that end: what is true, real, folid happineffe what is deceirful, and imaginary: this, and the like, often and fevisilly thought upon, mult of needlity bring: a man to a defire of thing after God, and to a purfute of the means, a confciencious life, and the like. V. 8. He serteth in the lurking places of the villages.] Some of the Rabbins by ATI here turned villages, understand arria, that is, open Courts, publick Halls, and the like. The word of it felfe doth include both fences we know: and fome Interpreters, befides Rabbins, like well of this latter, as if David aimed here, by this word, not at petty theeves, who rob in obscure places; but at the grand ones, who in open Courts, and publick places of Commerce, by perverting justice, by horrible, though tollerated, and allowed extortions and exactions, and the like, do the same as the petty theeves, with as bad a confeience; but with more credit and allowance. And here some invelgh very much against Merchants, as men usually very guilty of this kinds of theft. For my part, I do not think so ill of that prosedion, but that even amongst them, I believe may be found men of great integrity, and generofity; nor fo well of any other, that is a quaftuola professio, (that is, whose chiefe end is gaine and profit:) but [that it will afford examples of such theeves good store. But that this word "MINU doth also signific retia, is not a thing agreed upon, and generally granted: and being chiefly grounded upon that place of Efry, is will appear upon further examination, but a weak ground. That it somities foundation, is not denired, or doubtweak ground. That it fignifies foundations, is not denied, or doubted by any. Now, foundations, taken metaphorically, may be applied by any. Now, foundations, taken metaphorically, may be applied to many things: which hash bred great dwerfity of interpretations. Most think by foundations, the Laws, execution of justices, &c. upon which Common-weales are chiefly founded, to be macro control to the control of the contro very foundations which kept up other ftructures, are overthrown and then no wonder, if the righteous also have his share of sufferings. Fret not thy felfe, &c.) according to the condition of thole times: yet in the New, we read plentifully; fo that all execution of justice and judgemeet feems almost to be referred to that time : to that at left, if not as the onely, yet the proper time. See 2 Theff, I. v. 5, 6, 7, 8, 9. Which is a manifest tolen of the rightens judgement of God, &c. Nay from this very thing, (besides the revelation of Scripture) many learned men have interred the necessity of a future judgment, because we see things fall out oftentimes, so contrary to what we apprehend of Gods juffice, in this world. We may the fooner be induced to believe that David by these words intended eternal paines and torments, because hell in the New Testament is not onely fet out by fire ; absolutely : but by fire and brimstone, in St. Johns Apocaypfe, more then once t the original of which expression in St. John, hough it be truely derived from that particular fire and brimflone, which was the destruction of Sodome and Gomorrah; as in Genefis we read at large, Gen. Ch. 19. and is further confirmed by our Saviour, Luk. 17. 19. yet it is possible that it was not without one alluston robby years along a Parish years the of Parish at the same without one Saviour, Luk, 17, 29, yet it is possible that it was not without some allusson to this very place of David, and other like, if other like be. However, if we follow this first instructions, it is end for using it we will make a mystery of its counterance, and the february laces of the february plurall of this affixe; fince it may be either plurall, or fingular, Now for the sence of the words according to this fift translation; we need not go far : the countenance of God is proposed un'o us, as the fumme and perfection of hapineff: There be many that fay : who she imme and perfection of napinem: There he may ton 1991 into will flew us any good ! Lord lift thou up the light of thy commenant upon us. Plal. 4.6. But Econdly, if we translate, (as we may very well, without doing any violence to the words.) The upright (reflicted) to reflitted to reflitted to reflitted to the three three houses of the three three here were the three three houses of the three three here we we in the Scripture there be many:) that fee thy face: then have we here a cleer expression of the happiness of Gods Saints in heaven, the control of the saints of Gods Saints in heaven, the control of Gods Saints in heaven, which doth confill in the beaufield vision, as it is called by the School-men: according to that of David, Pfal, 17, last vertex from (Laving poken before of worldly men happingle:) I en jor me (naving ipoken betore of worldly mens nappinene), will behold the face in rightenfinely : I find be faithfed when I awake with the blenefig; and that in the Colpel forcer of this Disciples: Lord flow us the Father, and it sufficient us. Like of this here the better, because it will confirme the interpretation of of this nece the netter, necaute it will confirme the interpretation of the former verfes, fire and brimflone, &c. of which we have folder there: it being so much the more probable that by those expessions.

by this here, eternal bleffedneffe is fet out, and proposed : of which no question can be made, if this translation of the words, against which I know nothing very material, that can be objected, be allowed of. But because I think it the part of a faithful Interpreter to unfold and pursue the riches of Gods word, where it may be done without affected and groundlesse subtility: I must not conceal from the Reader a third interpretation of the words, not leffe warrantable, for ought I can fee, then either of the former, and affording a doctrine full of comfort, and of great ulc, in time of great confusions. It is this: Their faces (of the just and righteous:) shall see him righteeus, or, that he is righteeus. The Providence of God, which in this world is an object of our faith; it shall be hereafter, of our eyes : we shall then know, and discerne clearely, (and in that, no small portion of our happinesse:) which we do here but imperfectly; (wirnesse, David, Jeremy, Habakuk, and for many other of the godly that have stumbled at this block, even ready to fall, as themselves have acknowledged:) that God is just and righteous in all his wayes: and that all things, even that feeming ofperity of the wicked, which now we can fo hardly brook, was but a mystery of Gods wildome, to bring about with more admiration the true blessednesse of those that put their trust in God, and have patience unto the end, &c. Very pregnant are the words of Malachi to this purpose: Te have said, it is vaine to serve Ged: and matacum comp purpose. ** e nave junt i 1 w wante to je ve ve veta * and shap prifi is it. Rec. And now ne call the proad happy : yea they that warte wickednesse, are yes elevered. Mal. 3, 4, 15, then follows vete 17, Rec. In the day when Imake op my jewels Rec. V. 3. taleth] Or, receiveth, or endureth.
V. 4. In whose eyer a vile person is someomed] It is out of all question, that the original words do afford that sense also that was in he former English translation : He that fetteth not by himfelf, but is holy in his own eyes : which fenfe is not rejected by any, as not agreable to the Hebrew; but because they conceive the other, (which we have here) to be more agrecable to the context. For, fay they, most things here fet down, have reference to mutual conversation; and therefore more likely that David intended here also somewhat to hat purpose, Besides, some ad the opposition between the two members of this ver!, a vile person contemped but honoureth them, &cc. I am so against this sense, which most do follow; though for the other, we have the authority of the Caldee Paraphraft, of great antiquity, which is somewhat: nay and some Rabbins too, of very good actount. But for the reasons that are opposed, they are but plausible, at the most, not convincing; of the first, which by most is insided upon, we shall have occasion to speak in the next Note, and shall examine of what force it is. But grant it plausible; may not this be as plausible, that David intending here the description of a perfest honest man that is in the right way to heaven; as he describes him by his moral performances, without which, it is certain that there is no way

by min, nere. (traits, mount sum or mount Minight) types and the figures of habitation i elpecially 6x to many the members, objected against his fami. I according these of habitation i elpecially 6x to many the man in (AC of many the man in (AC of many the many th boly hill, here, (that is, mount Sion , or mount Moriah :) types and the opposition of the members, objected against this sense : I account I think very good and warrantable too : as was faid before.

In whose eyes a vile person is contemned] This must be understood with certain limitations. First it must be a vile person indeed; not in our own private judgement; nor upon a judgement grounded upon particular quarrels and interests; (for most are very prone to fly in the face of them, whom they suppose to have done them wrong, though it may be a wrong judgement in them to think fo; and that the cafe, by men inmethat is a nearty Children and think in minar happened at the world, to have the priviledge of fuch a host, unto which he may be made the priviledge of fuch a host, unto which he may addiffernis otherwise apprehended; blue generally fo accountedly all, freely repaire, and wherein he may perform his duties and devotions, or most honest men, that make profession of goddiness, Secondly, we must distinguish between private men, and Magistrates. Fateor quidem fi dominentur improbi, non ita spernend is effe, quin illis pareamus, &cc. 1 must confessed wicked men be in power we may not so far contemn them but that we must yield obedience unto them so far, &c. they are the words of one upon this place, whose zeal was not alwayes tempered with so much discretion and moderation as himself, in some of his Prefaces and Epiftles, doth acknowledge and bemoane; as might be wished : however, for his zeal, and much other worth, by men of zeal and moderation worthily honoured: but very unhappy in many of his Disciples and Abettors, whose ignorant rigidness, in the most, and contempt of all antiquity, hath been the occasion of many troubles both in Church, and Common-wealth. But this, obiter only. If we must obey bad men in authority, in all lawful commands; much less are we allowed to revite thom, Job 34, 18. It is fit to fay to a King, Scand Exod, 2: 27, confirmed by St. Paul, Act, 23, 4.5. However so far a vide man (wicked, impious, farilegious, Se.) though in authority may and must be contermed by us, that what respect we give him, must be in submission and obsclience. to God; not out of any admiration, or high efteem we have of his greatnefs, wealth, honour, power: which things we must look upon with a geerous formand contempt: nor think them happy for this their exaltation, and glory, be it more or less but rather (within our selves, at lest)

When the wicked firing as the graffe, & .) and pray to God to keep us and our friends from fuch places, fuch preferment, fuch profecrity; and to blefs the condition of an honeft beggar, before theirs. As for others that are no Magistrates, and are known to have prospered by wickedness, it were not amis if such were publickly scorned by all men, ne se magnum aliquid adeptos putent, qui bue felicitate perveniunt, ut rideantur : that they may have no occasion to applaud themselves, but to repent, when they fee what is the fruit (even in this world) of their unrighteous courses; rather to be an object of scorn, then of envie.

he that fweareth to his own hurt, &c.] 'He that fweareth to his neighur, and disappointeth him not : was our old translation, embraced not own, and all appointer num not a was out out translation, emporaced not only by all, or most ancients, and by all Moderne Interpreters and Commentators of the Roman party: (as many, at least, as I have seen;) but so well liked of by most of our side, that were it not for the Hebrew points, which are conceived to crofs it, they flew a good inclination to refer it, before that we have here. Indeed there is reason for it : the fame as was alledged before, for that fence, In whole eyes a vile perfon is ontemned: because most passages in this description, or character of a moral honest man; are conceived to relate to mutual conversation. I confesse, that is some reason; but not of such sorce, that except we can answer what is objected against it, I would think my self bound to give it the first place. The objection is, that אוני sopieted as we find it in our Hebrew Bibles, fignifieth malum, not proximum. The one to be read barangs, the other, hareangh. Calvins words are observable: optime quadraret Graca versio ; nisi puntla obstarent : quibus tametsi nunquam cavuerunt Hebrai, credible tamen est, non semper scribendo fui fe ab illis expressa. It is not likely, faith he, though points have alwayes been, yet that they were always written. Any man may fee, what he aims at, when he doth fay fo. Yet he dares not but embrace the other version. Another tells us plainly, (a man of great exactnelle, for the text, and particular words, as any hath written upon the Bible:) that though it be not fourfully, yet he knows no reason to the contrary, but that rang both here, and in some other places of Scripture, may be taken for reangly, the difference being so small. It cannot be denied, but that there be examples, good ftore, of far greater anomalies and permutations of words, in the Scriptures : Which have been collected by learned men, and are obvious enough to men acquainted with these studies. However, since that sense med performances, without which, it is certain that there is no way is good too, and very warrantable, that is mide of the words, without that, is but this thift; there's no calon that we flould impose it upon any man a-more delution and hypocrific to all of that he flould ad flouewhard of gaint his will just his that we have followed. a just and godly mans apprehension of his own insufficiency, to per-just and godly mans apprehension of his own insufficiency, to per-turn of fulfil the law: upon apprehension whereof he must, laying of the word, JT: at least, so pointed. We shall therefore take that sense aide his own righteousness, cast himselfe of necessity upon Gods into consideration too, and another too, besides that, though not ore iments and the forms other way of falvation, then what he can liarly taken notice of a fater what fail forms one of this we find from his own performances? This would be very well expected are now upon. Of which all that we have more to fay, is concerning the by these words to rendred; that setten not by himself, but it lowly, &c. word reangh, in this and the former wries, commonly translated proje-and would very well agree with Christs judgement concerning the mus, or neighbour; that we take heed of the mittake of the Phirises, who proud and high-conceited Pharifee, (fet out unto us as a very inno- by neighbur, in the Scripture, (as where we are commanded to love o t Poud and high-conceided Phartice, (tet our unto us as a very sunnousy name of the property of the three commandation to over a resummandation over a resummandation over a resummandation to over a resummandation Annotations on the Book of Pfalmes.

he that sweareth to his own hurt, and changeth not.] Most Tewes expound this, to bis own burs, of penances, by vowes impo-ded upon our felves, whether upon our own bodies, purfes, goods, or any thing that belongs unto us. In this fence, the word evil or any tuning that ociongs unto us. In this ience, the word evil perchance, would be more proper then burt. The Grecians also call fuch penances, such especially, that are inflicted upon the body, RANGONC, and RANGUXIAS. As this sence is not to be excluded, since we know that this very thing was taken into confideration by the Law of God; fo I grant that I fee no reason to make it the proper fence of the words. It is ordinary for men to make bargaines, and to pais their words, and to confirm them by oath, and afterwards to repent, Or to pomise of their one accord, and to bind themselves by oaths and afterwards to be forty. It were well if Christians, ordinary Christians were as strict, and conscientious in keeping their oaths. as ordinary heathens, Romans especially, have been, But a hundred evasions have been sound out by Christians, that were never thought of by heathens, or if used by fome, yet condemned by most; yea and feveral punished in some places. As for forced oaths, or unlawful oaths, it affords many speculations, and limitations, which we are not here to determine of I find a third translation and interpretation of the words: that sweareth to do evil (to another, to be supplied) but doth not recompence it: or, fulfil it. This sence is not very probable, and therefore less will serve of it. It is true, it is the part of an honest therefore lets will lerve of it. It as true, it is the part or an noneit man, if he have made any fuch yow, or oath, nor to keep it; but to repent of his rahmels, and per jury. For though their may be more hurt in the execution, then in the perjury 3, yet the unlawfulnes of the execution, do hot not acquit him of the guilt of perjury before God. A godly man that makes conficience of idle words, will not consider the confidence of the words. eafily infinare himfelf with fuch rath oaths; and therefore though camy nunare numers with men rain satus; and incretore though fach a thing may happen perchance, yer it is very unlikely that Da-vid in this his defeription, among other particulars of daily occur-rence, would infift in a cafe fo extraordinary as this.

So God as he is faid to fearch the heart, fo the reines, often : and fo joy, as to the heart, Prov. 23. 15. my heart shall rejoyce: fo to the rein:s in the next verse, yearny reines shall rejoyce; is ascribed. To lecke a natural reason, (which some do here) I think is not fo necellary, as I think it impertinent, in any body, to require it For common words and expressions, in all languages, generally and custome, then by any reason grounded upon nature. Purgalis auribus, and emunda nare doth very well in the Latine, to expresse quicknesse of sense and apprehension : in some other lanexpress questions or tente and apprehension. In the orient far-guage it would be merer nonfende. So, pethis fapiens; and ex-pethirare fapientiam; and the like. However, it is common to all languages, to fer out wildome, and counfel; by profundity, and ferrecy, to which purpose the veines fit very well; besides what may be faid of their refemblance to the heart it felfe, observed by may be laid of their recembrance to the next it letter ourseven by the hypocrates; and further explained by Anatomills. See allo upon Plai, 38, 7. For my lynes, &c. Now because the motions of Gods, Spirit, are feerer and invisible; and the fittest time for them, when we are freely from other objects, and most retired to our when we are freeze from other objects, and most retried to our felves; which is chiefly in the night, upon our beds; therefore most interpreters, by this inftrullion of the reinet here mentioned, understand, divine inspiration, sanctified thoughts, secret in-stances, and the like; which may receive some constinuation from Pfal. 51, verfe 6. Behold thou defireft truth in the inwardparts; and in the hidden part thou hast made me to know wisdome. Anatomists teach, that the kidneyes have two membranes; an inward, very thin, without any fat, or veines: and an outward, which is very thick of fat: infomuch, that in groffe bodies, the kidneyes are as it were hidden, and appear not cassly. And there-fore say some of them, to fearth the reines, in Scripture, is as much as, to seek out, and to bring to light, things that are hidden, and abstruse. Their confidence makes me take notice of it: but if we were to discourse it, somewhat else might be found, not leffe probable and fatisfactory, I believe; but whether

&c.] The words in the Original Hebrew, if taken by themselves, are all plain enough, but the construction and connexion of them is very intricate and obscure. Some of the most accurate, translate the former words: Quod cogito, non transferdietur or meum. Or, quod cogitavi, non transferdietur os meum. or, quod cogitavi, non transferdietur, which they expound to this purpose, as if he professed, that he was no hypocrite or dissembler; but that what his heart conceived, his mouth uttered, and no other. Though we cannot finde fault with this translation of the words, neither with the sence, or sentence (if considered in it self) that they gather out of it; yet how to gather that sence from those words, I do not well see. The same translation leaving out the good, which they adde to the Text, to make that sence they would have, will afford this sence also, which we have here approved of by some will altord this lence also, which we have nere approved of by some of the best: and I should think Plal. 39. Then, By the word of thy lips, &c. that is, Neither shall I be tempted (being better infureded by the Word of God) by the success of the wicked and violent. to follow their example. Best Interpreters agree, that the prosperi-ty of the wicked is here spoken of by David: which is also confirmed by Pfal. 73. which treats wholly of that fubject, where we finde ed by Pfal. 73, which treats wholly of that fulpied, where we finde fome of these expersions, as ver. 2. The particular occasion, upon which, as is by most conceived, this alm was first penned, was Davids war against the Ammonices, and Syrians; of which we read 2 Sam. 10. & 1 Chron. nices, and Syrians; or which we read 3 2am. 10. & Luton, 19. This conjecture is chiefly grounded on the 7, verfe, Some thruft in charets, and fame in horfet; because particular mention is made in the History (i both places be looked upon and compared) of great number of charets and horfemen, taken and fain in that Wart. As for that feeming contradiction, that is observed by most in that relation, in the number of the charers and horsemen: we will not meddle with it here, as not so nedeflary to this place.

Kling, 18, 38, 1 Chron, 21, 26, Chron, 7, 1, But it is not likely, that David would require of God fisch an extraordinary fign, which being done without foins fleetial warratt from God himfelf, is a kind of tempting of God: neither is it likely, if any fuch thing had happened, but that it would have been recorded in the Hihad happened, out that it would have been recourse in the tri-flory. Alchough therefore the word properly fignific to trainine affects, (or, to make fat) yet because that miraculous turning into affects, or consuming of the facrifices by a fire from lieaven, was a certain token of Gods acceptation; by an ordinary trope of the effeet for the cause, it may signifie no more here, then, to accept, in general; as it is well rendred in the Text.

This commemoration of Davids facrifices, is not to this end, as though the oblation of fuch things was of it felf pleasing unto God, or meritorious with him: as the idolatrous heathens did believe of their Gods, (though reprooved for it by divers of their own Philosophers:) and therefore made bold in their addresses unto them by prayer and supplication, to put them in mind of their coft and charges in their oblations, whereof we have an example in the very first of Homer his Illads, in Chryses, Apollo's Priest, his prayer to Apollo: God himself doth often profess to the contrary: as particularly, Plal. 50. 8,9,10. &c. I will not re-prove thee, &c. the drift and scope of this commemoration here is but this, to set out David his piety and seare of God, by those outward solemne performances, appointed then by the Law of God, and in reference to his commandement and institution, not to be omitted, but performed with all reveren e and devotion. V. 4. He asked life of thee] I conceive (which is the opinion of fome others alfo, though not fo fully fet out and explained by any Iknow) that there is an antithells, not in the words of this verse only, but between this and the former verse also: by which antithesis the goodnesse of God, and the humility of David is more fully and movingly fet out unto us, and expressed. Life, though the and movingly let out unto us, and exprended. Lite, though the chiefest of temporall blessings in some respect, (as in point of price and valuation; for what would not a man give, or forgo, for life?) yet as it is the foundation of all others, alwayes to be

presupposed before any other can be asked or granted, (for what can any man enjoy in this world, if he have not life?) so it is the meanest and lowest of all others. This antithesis is used by God himself, in that answer he made to Baruch, by the mouth of Jehim live, &c, God in his great mercy, and favour towards him, did not only grant unto him that which he defired, the meanest of and not only grant union mutuat which is a cented, the meaneth of requelts, life; but with it, the highest of temporal blefings, a crown, a Kingdom; and that too, not an ordinary Crown, or Kingdom; but a crown of pure gold; of which words more hath been only the company of th faid upon the former verse.

Hretched out beyond ordi-nary computation; yet because we neither find that the period of Davids life was so over-long above what is ordinary: nor that he Davids lite was so over-long above what is ordinary; nôr that he land any direct p-omlife from God by any revelation, or otherwise, that he should live so long as he did, it is more probable that this is to be understood of his living, or surviving in his posterity, by a continued succession of Kings and Princes that came out of his loynes, to divers ages after himself. reference, mo e or lelle, and are applyable to Christ; yet this difference is observable, that whereas the most, literally belong unto David, or fome other; and allegorically, or metaphorical ly to Christ: som: there be, (in part at least, as we said before,)
that are literally applyable to Christ; to him more, than to any other. Of which kind, this is; as may appear by the 8, 16, & 17. verses; besides all in the end, from the 26, verse; which all men confess, more properly and literally to belong unto Christ and his Kingdome, then to David, or any of his posterity, befides Chrift. It will be therefore our task in fuch , to take notice especially of the main, and most proper scope : that is, to consider them, as principally intended of Christ

Verf. 1. M Tood, my God, why half thom forfaken me?] These words were uttered by Chiff upon the Crofs, and though nor the very laft, yet among the laft that he fake there, before he gave up the Ghoft. They are very confiderable words, in divers effectly; as thall appear afterwards; though I allow not of that reason that is given by some, who think the Evangelists
S. Matthew, and St. Mark, to have recorded them, not translated only, in that tongue they wrote in , to wit , the Greek; as is usua with them upon other like occasions; but in the very language and syllahes they were uttered in by Christ; that is, the Syriack; a dialeft of the Hebrew, then in common use among the Jews; of pur-pose, as they think, that we might take the more notice of them. pofe, as they think, that we might take the more notice of them, Whereas the true realon is, because if these very words that Christ facely, had not been recorded; none, but very skilful in the Hebrew or Syriack, could have underhood the ground of that birter mock and derifion of some then spectators, who because Christ had faid Bl, Bl, (or, according to the Syriack promuntiation, Eli, Elin;) that is in English, Mg God, my God: hence took eccasion to mock, (or rather indeed, to slander him; for it would have been a very odious thing in those dayes, to hear a dyligman call upon any other then God;) as though he had called upon . or for Elias. Mgth. 27, 27, 80 upon to come to the feed. upon, or for Elias, March, 27, 47. But now to come to the sense of the words; they are words at which divers have been not a little of the words; they are words at which divers have been not a little feandalized, as either argaing some kind of despair, or at least much impatience: whence it is, that divers glosse and constructions have been devised, to turn the scope and sense of them and the state of the s other way , then in o dinary conftruction they feem to run. Some have been bold to fay, that what Christ spake, was but fainedly not out of any real fense, or maning : not to express his own thoughts, but the better to conform himself to the common opinion. But this is too abfurd, as to need any confutation. If there were any appearance of evil in these words, as it seems they conceive, that are so much offended at them; they might have confidered , that we are to forbear , not only that which is evil in it felf . but even that (where no indispensable duty doth bind, nor consideration of a greater good doth preponderate; neither of which can be faid of these words , by them that are oftended at them ;) which hath the appearance of evil. But this cone it is not to abfurd , but theirs (though not more true, perchance;) may be accounted as wittheris (mongh not more true-pertrainers) may be accounted as win-y, who would have Christ to have repeated this whole Pfalm, hang-ing upon the Crofs, or a good part of it, and for to have uttered their words (which only are mentioned by the Evangelifts, they fay, she cause they are the first of the Pfalm, as is usual in quotations;) no absolute has a way of marking are against a word way. otherwise then by way of repetition or meditation. I would not say, what fome do, that it is not likely Christ would repeat so long a Malmat the Cross: I have read of divers Martyrs that have repeat-Palmat the Crois: I mave read or divers many is that have repeated the whole I to Deum at the flake, or going to it, which is not much left in length. But the words of the Evangelifts, if looked upon, are a fufficient confutation of this opinion; who fay not, (neither of them that record them;) that Christ spake , or repeated; but , cryed with a loud voyce. Many of the antients have faid, that Christ spake wild a towa wore. Many or the anteents have hate that the person of which words, not in his own person, properly, but in the person of whole mankind. Which indeed is true enough, in some sense; to state that sense they mean, to free Christ in uttering of them, from all trouble of min !, or fense of grief, or fear, I cannot allow of it, They might as well say, because he suffered not for himself, but for mankind, therefore he felt no pain. Yet this is more rolerable by far, then to fay, that the Deity of Christ, did withdraw it felf at that time, fo that there was a real separation; and from that separation; this confusion of the humanity left to it self. By these, and dirers other expositions that we will passe by, doth appear what men have thought of the literal fense of these words, which they have benso folicitous to avoyd. But now let us fee what is faid, or can be oceaso folicitous to avoya, but now let us fee what is analyse and led to take away the offence, and yet to preferve the literal fenfe. That Christ, as man, (though God and man still but the Divine nature by a special providence and dispensation withdrawing or sulproduing its influence for a while;) did fuffer partly in his body and partly in his foul, (but more in his foul, then body) more then can either be expressed by man, or imagined, I do not see how any reasonable man can question, that reads the story of bis passion , from his bloody sweat , unte the end ; and considers

we might know how much he hath fuffered for us. I will not fay, that there was a necessity he should fuffer so much, j ft som ch, both in body and foul, to make his fufferings available to our redemption, both of our bodies, and of our foules. This I dare not fay, because I have no warrant for it in Scripture; and bare huray, because a nave no warrant for a mocupante; a no back nu-mane rationation in these things, is meere folly and mandness. It is enough for me to know, that Gol had appoint dit so, and in hu-mility to adore beyond what I can understand. But that Christ did actually fuffer very much, even beyond what can be conceived ! I believe , as I believe the Scriptutes. If then his fufferings were extrao: dinary; why should not his expressions b: so, by which we might understand (fo far as can be conceived by man) the greatness of his pangs and agonies ? In this case, such words as thele, My God , my God , &c. were words of fenfe , not infidelity. Neither are fuch expressions inconsistent with a perfect security of Gods love and favour, at the same time. There may be a contradiction in the language of sense, and that of faith, if in themselves considered; but no luch inconfistence in the nature of the things, from which that variety doth flow, but that they may meet in one. Doth not that variety doth how, but that they may meet in one. Doth not Ecclefiaftes in the same clause, and with the same breath say, Though a same the cuit, and his dayes be prolonged; yet I spow he shall not prolong his dayes, Eccl. 8, 12, and the Propher Habakkuk, of his vision, though it tary, it will not tary? (Hab. 1. 3.) And even Plato, a heathen Philosopher, among them that were led by fense and reason only, of greatest account, in one of his Dialogues called Phædon, towards the end of it, tell us that at the same time a min may believe, and not believe? And why not a man in fuch an extremity expollulate with God that he hath fo faken him: though his heart and faith tell him at the fam; time, that God hath not , will not , forfake him ? And indeed , if we mark it , (it is observed by most interpreters) the very words imply as much, and interpret themselves. For at the same time that he saith, God bath interpret themselves. For a the same that it as a tan, odd nath for a left, which his fenfe, and the violence of his pangs expressed from him; he calls him his God; (My God; My God;) an argument of his faith; to which agrees well that of David in another place, But I trufted in thee , O Lord : I faid , thou art my God , Pfal. 31. 14. And if this be not fatisfactory, confider we the words, first as spoken by David; and there we finde in the same Pfalme, mitt's poet on y Javan; and were we muse in the same training, (verle 34.) For he hair has diplied, an adharted the afflittion of the afflitted, achiber hair he hid hi face from him. but when he cried an about the same and the ipake thim in no other tenie then David one 17 and you mail near him foowafter, (as in Saint Luke we finde) faying, Father, into thim hands I commend my spirit, Luk, 23,46. Why then finald any offence be taken at the words? But because Christ was no orany offence be taken at the words? But because Christ; was no ordinary man, and that to bear any pain or griefe, without any figne of commotion, shath been thought by many to belong to parket magnanimity, and height of fiving; befides what bath afterady been laid, that what Christ did luffer, was quite of another kind, of fare how the meadinest of ordinary furtherings, as himself was above out. Many man, we further briefly fay; that Christ was pleafed to ided to fine for feeling : 16 far. 1 That he movie flow the ordinary man. mary man; we further briefly lay, that Chrift was pleafed to yield ato fine (or feeling; 1) for at. 1. That he might show himself a perfect true man; (a thing not easily believed, as appear es by the multitude of herefes about his nature, that forang up soon adter the first plantation of the Chriftian faith, 1) there being no greater when the conditions of the Chriftian faith, 1) there being no greater evidence, to ordinary judgment, at least, 0, disperved humainty, then his being subject to the common infunities of man, sin only excepted. 2. For our fakes, to keep us from utter fainting, and despair in our greatest trialls, 'combats, and assistions, whether spiritual, or corporal, when Go leems to forget us, withdrawing the comforts of his grace, and the benefit of his help, as fometimes he doth, even from the best, and his best beloved for a while; that then remembring what Christ himself, so neer and dear unto him, was put to, we might have comfort. And although this of Christs fufferings were an extraordinary case, not liable to the rules of ordinary humane ratiocination; yet for them that think a Stoical abathie, or unpassionatness, to be the greatest evidence, or character this, or unpationarines; to be the greater evidence, or children of true magnanimy; 1 final commend unto them the disputes of two famous Philotophers, recorded by Aulus Gellins, a known ancient Writer, in the 19, book of his Nathra Articles, (to called) cap, 1, &c 13, There be that translate these words, [TUSY] TO? cap. 1. 6. 12. However, their opinion likes me better, who by holy, here understand gra. ious, and propitious i in which fense we know the Latin word Pins, is often aseribed to God, by Ancient Ch istian Writers. The ground of this fignification might be, from the place where the Ark, and p. opiatory, or Mercy feat, the covering of the Ark) flood, which was called the hely of holies. The Hebrew word VOIT fignifies to will, and allo, to delight, or, take pleasure in word was manners to some, and any, to accepts or, race pleajure in a thing. The Septuagint defirous (as in many other places) to keep to the Hebrew as clock as they could, rendered it by the Greek 36Anv., intending thereby doubt effe the fame fenfe, to delight, or take pleasure; though the Greek word of it felf, according to the take picalure; though the Greek word of the first account to the propriety of the Greek tongue; fignificath, to wild, onely. It is well known that there are infinite Greek words, used by the Greek translatours, in another sense, or notion, then that which is proper unto them : which as they are used by them, are commonly called bellenifficall words. Now the Evangelifts we know, used for the most part, the translation of the Septuagint, as that which was then commonly received among the Jews; and which they were fo used unto, that their Greek often hath more of the Hebraifme, then it hath of the Greek, that was accounted true Greek in those dayes. Thefe things confidered Mat. 27. 43. where this paffage of the Pfalmift is uled, of has auriv, should not have been translated, if he will have him, which doth much obscure both the sense, in it felf, and the reference the words have unto this place : but, as it is here, Sceing he delighted in him, or, as it is in the margin, if he delight in him.

But thou art be This alternation of expressions, some tending as it were to despair; others to hope and confidence, often used in this pfalme; doth fet out very lively the Pfalmift his conflict (and in him, every godly mans in the like case) between sense and faith: and makes the whole Pfalme, by this mixture of feverall passions and astronoms, the more patheticall, and poeticall too.

that took me out of the womb, dye.] It is generally believed, that Davids aim here is, to comfort and incourage himself by remembring the wonderfull power and providence of God toward infants, oring the wontertun power and providence of our toward minants, even whileft they are flut up in the womb; and afterwards, in their nucling, and prefervation, whileft fo tender and helpleffe of themfelves: in all which it cannot be denied, but the power and providence of God doth fing larly appear in divers particulars, as any man in some meanngalary appear in divers particulars, as any man in fome mea-fure, if he be not very flupid, may understand; and is acknow-ledged by most accurate Anatomists and Physitians, as well healeaged by most accurate Anatomius and ruyntains, as well nea-thens, as others. The very opening and flusting again of the body, when the child is to be born, and to come forth into the world, is a thing so incomprehensible to Naturalists, that they worlds, as thing to incomprenenting to Patturaities, that the acknowledge (fome of them at leaft) the immediate hand approved God in it; because they see not by what power of nature (though that also be the power of God, the auditor of natures), it is brought to palle. And there he many questions proposed about it, which no man can resolve, or scarce any doth take upon himself to resolve, as to give any sarisfaction. Nevertheless, this being to general a providence, not extending to men, or mankind onely, (though more particularly belonging to them, because they onely are capable by nature to understand it, and to praise God for it:) but even to brutes, (more or leffe,) of all forts; it feems to me more probable, that David had a more particular aim in these words; as either to remember some particular providence of God, towards him, even in the womb yet; or fince that, in his infancy; in some extraordinary deliverance, or the like; as it hath hapned, and doth daily unto many : or that he intended nath names, and own daily unto many; or this is income of by, (which he night have good readon to believe; and mult needs, if he did believe it, breed great confidence,) that God were from the womb bad fewarted him, that is, among many others, by a particular, or special providence, had called him the providence of the providence of the confidence of t out, and deligned him to some particular work, or ministery, and therefore had, and would have, in reference to that end and first lection, a more particular care of him, and every thing the happed unto him. It is acknowledged by the learned, that these words from the womb, were commonly used among the Hebrews proretailly, and hyperbolically; that is, by way of stronger expression; as Plai. 18. 3, 4. chranged from the wind, and list, 48. 8. called a transfergirely from the wind: and lot of a man cilled by God to some extraordinary work, or otherwise means above the common condition of men, it was faid. That God had spenated him from the wind; as the Aposthe fields of himself; all the strength of himself; and it is the words be referred to Christ, to whom we have already faid, that this Plain doch more properly belong, we need not got metaphors, and figures for application; the bare letters enthing the strength of the strength and therefore had , and would have, in reference to that end and shall serve in generall to say, that from his fi st conception, to the last hour and moment of his conversation among men, nothing the tast four and moment or nis convertition among men, manufind did happen unto him, but either was altogether missalony or apparently carried by a fpecial! V. 16. they pierced my hands and my feet] Much ado there is about these words, as between Jewes and Christians; in general; so between Christians among themselves Papists and Protestants. That the ground of the quarrel (of no great consequence indeed) on both sides may be understood, these it is, בארו וו Hebrew, fignifies, foderunt, they have pierced: בארו caari, ficut leo; as a lym; the D in the first, being a radical letter; in the fecond, a fervil prefixe, as Hebrew Grammarians are wone to fpeak. Now our Hebrew Bibles, all that ever were printed, (one or two editions, as I take it, excepted) bear, not 173 fo-derunt, which is our Translation, and is of all Christians, generally ; but 1783 ficut Leo. This therefore the Jewes lay to our charge, as a corruption of the Bible. But we answer, that though all Hebrew Copies, of late ages, have it in indeed, as it is commonly printed : yet some ancient Copies, as by their own testimony i proved, had it INNI (with a Vau) not INI (with a Jod,) as it s now. אום and ארן is all one in fenfe; all the difference in but of one vacant Aleph, which in many places of Scripture besides this, is added to words, without any alteration of fense at all; as the Jewes themselves, must, and do acknowledge. So that if there be any wilful corruption, it must lie upon their score, and not ours who translate according to the reading of the most ancient Copies followed also, and expressed by the Greek Translation, called the Septuagint; a Translation of great credit and antiquity: as used and received among the Jewes before Christs time. They render it of gugav; that is, foderunt, they have pieced. Of this the Papits (fome of them, not all: Genebrard upon this place, faith plainly, Nec tamen proptered locum corruptum dixerim, fed varia effe lellionis; that is, Yet I would not fay, that the place is corrupted, but of different reading onely) take hold against us Prote-stants, to prove that the Hebrew Text hath been corrupted. To them we answer; First, that there is no direct corruption of the Text, as long as the true reading may, by good authority of ancient Copies, and the testimony of the Jewes themselves, and their Masorithes, whose great work and task hath been, to preserve the integrity of it, be afferted and vindicated. Secondly, neither doth it appear, that any fuch corruption was ever intended by the Jews. in general; or that the alteration that hath hapned, did at first proceed from any fuch intention or purpole, either of Jew, or any other. Some Learned men have thought that the afteritious (or N Aleh) might be the occasion; at which, as they conceive, some ignorant seribe (because not ordinary) stumbling, and not knowing what to make of the word, to make fome lenfe, changed igno-rantly (thinking it should have been so) the final 1 (or Van) inmulty (thinking it should have been so) the sinal 1 (or lan) in the sinal 1 (or fact) and for he errour from one Copy to another, as tifually in such cases, was propagated. This, as it is here proposed, is probable enough; but all things well considered that blaid concerning this matter, by either Jewes or others, (all which to set down here at large, 1 doubt would be too tedious and imperiment) well weighted and considered, 1 think their opinion nor idle, if not more probable, who think that $1 NN_2$, as the Jewes, and ware allowed well the set of the side of the our ordinary Bibles read it, to be the true and genuine reading; but not in the sence that the Jewes of those dayes would have it but 1783 for 173 or 1783; fo that the fence shall be the fame fill, (foderunt, they have pieced) Though the writing be somewhat different. Now that there should be a fod at the end, infixed of a Vau, it is an anomalie indeed, but not without example, So NO3 for INUS, Ezra 10. last verse, and elsewhere in many places, which some have gathered together. But however we read he word, of the sence there can be no question at all, is out of Itwish writings of best account in this kinde, as I have already hid, easily to be proved and afferted. So that here we have a lagacity to be proved and america. So that here we have a dear refinmony for the croffe of Christ, which the more offensite it hath alwayes been, both to Jewes and Gentiles, (as indeed what can be more repugnant to sence, then a crucified God; the molt vile and ignominious of all punishments?) the more we eight to make of fuch testimonies; the best (though not onely) and fureft evidence, [as Saint Peter tells us, 2 Pet. 1. 19.) of our Christian faith. Piercing of hands and feet, was one of the chiefest firtumstances of crucifixion. Now to David, the words can have no application, but metaphorical: and so too, we shall be put to it, o hew how. I know not any Expositer that doth. But thus it may be perchance Fndere, may be put, (in this metaphorical fence) for pangere; in Latine it is often, I am fure. Now the lands and feet being, (according to the custome of those times and places, where most went barefooted) the naked places of the bodies, most exposed to the injuries of thorns and bryars; to pierce ones hands

or answer me: by some, hearing me; and thou hast answered me.

But the first is most ordinary: Which to make good first, the Hebrew preterit by a double enalage, as they call it, must be put for the future; and then the future for an imparative; which is not ordinary. I think therefore, that this translation here ought to be preferred, as more literal, according to the words; (for as for the ve, or u, in the beginning, commonly rendred and, to be taken for the illative, or caulal, for, is ordinary enough) for the fence, not inferiour. So David himselfe elsewhere, The Lord that delivered me out of the paw of the Lyon, and out, of the paw of the Bear, he mild deliver me out of the hands of this Phyliftine, 1 Sam. 17.37. So also, Plal. 56. 13. For then half delivered my foul, &c. and what is there noted. And Pfal. 63. 67. When I remember, upon my bed, &c. And Pfal. 85. 1, 2, 3, &c. It is the fame argument, and it fits here very well in this Pfalm, where David, as hath been faid, interchangeably complaineth, and comforteth himfelfe, as present sence on the one side, and a lively faith, on the other, did prompt him. As for the Unicorne here mentioned in the translation, certain it is that the Hebrew word DN7 is the name of a wild beaft, approaching to the nature of a Rhinoceros: but different from it, as most conceive; described, Job 30, 9, &c. But what creature it should be, is not certain'y known. Mention indeed is made by Pliny, and some other ancients of Monneeros, (that is, Unicorn) which is commonly taken for the INT, not here onely, but often mentioned in Scripture. And yet whether there be any such creature indeed, as that which we commonly call the Uninuch creature inuces, as that which we commonly can the On-corn, with that shape, and those properties, as are commonly ascri-bed unto it, is much doubted, and by not a sew, both travellers and others, decried. The Unicorns horne also, so much in esteem, is by many thought a meer mistake, or imposture. It may suffice us to know, leaving the further fearch of this to Naturalifts, that DN7. undoubtedly is the name, (by what name soever it be, or may be called in English, or Latine) of a wild beast, very fierce and furious, and of great ftrength; an apt emblem of unjuft violent. tyrannical men or Princes.

V. 22. I will declare thy Name unto my brethren] Heb. 2. 12. Here at this verse begins the second part of the Plalme, all that followes afterwards to the end of the Plalme, containing matter of thanks and praifes for deliverances. Now, if as is generally believed, David made this Pfalme in the time of his distresse, then it must be conceived that he wrote this part by a propheticall Spirit foreseeing the issue, which we know he doth in some other Psalmes. However, the opinion: of others is not less probable, that this Psalme was composed by David after his deliverance. It is true, he dother that this condition, which makes the greatest part of the tet out ins condution, when makes the greater part of the Pfalme, fo amply and fo pathetically, that a min would not think he could write fo, that was now out of all fenfer of danger, or paine: and in prefent possession and enjoyment of a bleftle estate. But this might be done of him purposely, as for song other causes, so particularly, to stirt hundels in the amore information and full manuschapting of greater and full manuschapting of greater. himselfe up to a more vigorous annd full apprehension of Gods mercy, in delivering of him from such and such woes, that gave him occasion thus and thus to bemoane himselfe. However, supposing that the writing of this Plalme, were after Davi-l was de-livered, and at ease; yet it is to be believed, that what he relatest here of his thoughts, or words, is truly and punctually related as his very thoughts and words, in the time of his fufferance. And it were well, if thole that have had any experience of wors and forrows, did often in time of their ease and prosperity, call to minde, what their thoughts, and purpoles were, when in affliction. It was the judgement of a learned Heathen, that men needed no other teaching, or Philosophy (that is his word) then affliction, sickness, and the like : but fo, Si tales effefani perseveramus, quales nos fuintos profitemur infirmi, that is; if we practice when we are in health, and prosperity, what we do purpose and resolve, when we are in mifery. V. 26. The meek hill eat and be fatisfied Most translate it, the poor shall eat, &c. The Hebrew word will bear either. It was the poor man ear, &c. I he ristice word will bear entire, it was the fashion in those dayes, (not among the Jewes only, but Gentiles also) that when they did facrifice, they did feaft also: (from whence and that when they are lactified they are that and thou whence arole that controverife in the Apolltes time, fo largely handled and agitated by St. Paul in his Epitlet of the Corinthiars, about things offered to Idols: hence also it is, that this word feely, which proouerce to note: nettee attores, that this word forty, which poor-perly fignifieth a holy day, add of oblations, and other religious Cormonies; came to fignific a foleminy of eating togethet:) and the greater was the facilities, and the number of bearfs offer-days up-pon occasion on any wow, virtous, or the like; the greater was also pon occation on any vow, victory, or the like; the greater was allo the follomity of feathing and eating. Now because David in the former verie speaks of wowes to be payed; it is generally conceived by all Interpretees, (as many as infit upon the litteral fent: for fome palle it by, and take no notice of it at all;) I have seen, no tome palle it by, and take no notice of it at all i) I have feen, nor any excepted that David doth here promife great relief to the poor, to be bid by him, and plentifully fed at his folmen offerings. And this being the literal fenfe, it is by the fame Interbetters in the live of the poor and contempible (for fach were they for the most part, that were fire called) by the preaching of the Goffel; and particularly, of the Sacramentall receiving of the blefted body and blood of our Lord and Saylour. In which on the following the first hand a first for the content of the content of the following the form of the following the f and Saviour, by which our foules (if received with Faith, and and Saviour, ow which our jources (if received with faith, and other due conditions and circumstances) are scalled and nouring during termal life. This interpretation, (the literal I mean, of the poor to be seed and scasted) though I do not, were it but for the number and authority of them that follow it, altogether rejed; yet it doth not feem to me very probable, that David in fuch a Plalm would make to folemne a commemoration under such general termes, of a thing not to last above one day: or if two perchance, yet the utmost that can be made of it, is but one good perchance, yet the utmost that can be made or 18, 18 mit one good meal, or two. And then granting that this, even this relieving of the poor for one good meal or two, were a thing fo confiderable, (as in very deed, the feeding and relieving of the poor, and the like deeds of charity, in general, we acknowledge to be a maine point of Religion, Like, 11, 41, Jam. 1. laft verie, Pure Pellying the New York Deed Columbus Marsiands, we have convest the challenge of the poor that the deed of the poor that the state of the poor that the poor the poor that the poor that the poor that the poor the poor that the poor that the poor that the poor the poor the poor that the poor the p &c.) as to be fo folemnly mentioned; yet how comes the rich alfo to be spoken of, as follows in the 29, verse, All they that be fat upon earth, &c. is it likely that David would make such a matter of it, and in such general termes ? But if not this; what then shall the literal (for of the spiritual, there will be no controversie) sense be? Here I would have remembred what was faid at the beginning of this Pfalm, that there be divers passages, which literally cannot be expounded of David, but figuratively onely; but of Christ, literally. expounded of David, but figuratively oncuty plus of Christa. Retally, The most plausible and literal application to David that I can phansie, is, that usery and godlineste (as in a good measture it wast.) shall be established in his dayes; and with plexy, plenny, and security: all his Kingdom over. By eating, and being [a it jud, an easie life, my be understood; as by eating and distinking, Jer. 22. 15, whereof see before, upon Phal. 144; who et am pepale, 8c. 70 et and rejoyre, (where, by eating, that drinking also is comprehended, applications of the property where a command of the Lay, and an exception. reporte, (where, by earing, that criming allo is comprehenced, appears by the context;) was a command of the Law, and an expredient of great temporal happinelle, Deut, 14, 26, and elsewhere, Which makes the Pfalmift to infift upon it the longer; That the Which makes the Palamitto man, upon textue only of the prof, of, meet, fall ear; here in this verife; and the rich, or, those fall be far; hall teat; but with a limitation in both places, cells it might feem to relith of Epicurisme; hat so cating, they fall praise the Lod; in this; they shall worship, in the 29, verife; that is in general, that both rich and poor, great and finall, shall live at case, and want nothing: as it is, Plal. 24. to. The young Lyons (to which the meek are here opposed) do lack, and suffer hunger; but they that feek the Lord, shall not want any good thing. This I conceive to be the fense of the words, in reference to David. To Christ and the Gospel by him preached the application is easie. Of the generality of men, of all forts, professions, and conditions, (here included by rich and poor, and they that go down to the duft, &c. of which more there,) to be called by him, the Prophets are full, to which sorree the relations, and testimonies of fact, in the Gospel. Of the puor particularly, because twice here mentioned, in this, and the 29 verse; the words of the Prophet Elay are very considerable, and fit to be compared with these, Esay 55, 1, 2. Handlaton, emborated by The question is nor, whether this whole Psalme may be interpre-ted mystically, and applied to Christ, the great Shepherd of souls, &c. whereof I think there is no question at all to be made; fince in ingenerally granted, that all or most Plalmes, besides the literall or historical fense, may after a more sublime way, either wholly, or in part, be applied to Chrift, the end of the Law, Rom, 19, not of the Prophets and Pfalmes only, but almost of all that is written, and conteined in the Old Testament. And fince we find Christ by himself and his Apostles, so often fer out unto us as a Supperd; it were very strange, that any man should question the myflicall or allegoricall application of these words, and expressiand the discontinuous and copyriments of the words, and copyrimens, and the particular words the word p7B may be translated in its proper signification, justice, or yighteenspele; and this to be taken for the proper and literal safe, of the words. Hereforeth, or, towereth, or bringeth back, as others;) my foul, he leadeth me in paths of right, this to be un derstood spiritually, of the guydance of Gods Spirit, as, or much to that purpole, Pfalm, 119, last verfe : I have gone aftray like a loft beep; feel thy fervant, &c. For why should it be unlikely, that saving spoken of temporall and momentany bleffings, such as belong to this life; he should proceed to the chiefest, those of the , the fruit whereof is eternall > This, we know , is done elfewhere frequently. But it is objected, neither is there any other ob eftion against it, that I know of ; that it cannot be here, because he doth even after this, go on in the fame metaphore of an ordi-

nary shepherd, as at the beginning ! thy rod and thy staffe, &cc. I do not conceive this fo great an objection, as it is apprehended by the Party that objects it and befides what examples common Authors might afford, I finde this rule fet down by very learned Commentators, and well skilled in the Idiotifines of the Scripture: that Solet sape Scriptura non semper eandem servare metaphiram, sed paululum ab ca divertere ac mix redire: (Ribera in Joel c. v. p. 47.) whereof this example among others is given; Ezck. 16. 13. and thou didft profeer into a Kingdom: literally and properly to be understood of the Jewish Common-wealth; which, both before and afterwards in the same Chapter, in the verses immediately following, is spoken of figuratively under the type of a woman. According then to this sense, and translation: he leadeth me in the paths of righteoninesse: that is, he taketh care of me, to frame me to all goodnesse and vertue, whereby my person may be acceptable unto him, and I secured of a better life, an eternal inheritance hereafter in heaven, after I have run out my course upon earth, According to that of the Apostle: Neverthelesse the foundation of God standati fure, having this feale; the Lord knoweth them that are his: And let every one that namelt the name of Chrift, depart from inquity, of righteousnesses Justice, or, righteousness, soften taken in the Scrip-

tures in a large fence, and comprehends all manner of goodneffe t and not in the Scriptures onely, but in the writings of ancient Philosophes also. I shall set down some of their words, that Christians may blush, if their righteous nelle (for according to the opinion a man hold th, so is his practice commonly:) come short of the tightcoulnelle of heathens, that were led by natural reason onely. and the julicife thereof] Before he speaks of the Church and people of God particularly, which he doth atterwards, he first begins with the generality of Gods soveraignty over all the world, and over all men, as Creator of all to let us know; First, that al-though the Church of God hath a particular relation unco himsto be called his people, &c. yet God is the God of all men, and hath a car. of all. Secondly, that although God, by right of Creation, a ca: or all. occoming that atmosphere of the case of signs of sections, Administration, Substitution, Sec. be the God of all men in general: yet there is a select people, (called the Church) who have a more particular right to, and intered in his love, favour, and protection; whom he describes by certain marks and proprieties, external and visible: And because therein the happinelle of man chiefly confifteth to be of this number, that thus belong unto God more particularly; he therefore invites in the end all people and nations of the World joyfully to receive and entertain him, (by feeking to him, as verse 6, and conforming themselves to his Do-trine, in their life and conversation; which presupposeth a right knowledge of him) that so they may be partakers of the same hap-Some make the coherence of the words to be; that be ing to speak of the Church of God, then included in Ifrael, the better to fet out the mercy of God, in chusing to himselfe a peculiar people and nation, to own it for his after a special manner: He first begins with the generality of all mens relation unto God, as a nett begins with the generality or all mens relation unto God, as a Creator, and in that respect, the God of all, equally, and then upon mention of Sion, (called here, the bill of the Lord) left all Jewes fhould think themselves as Jewes, meerly, true members of the Church, (as indeed many did;) he sets down some marks and tokens whereby a true Hraelite might be known, and discovered from one that is so by name and outward profession onely. And then for the latter verses, how those also are by some made to cohere, differently from what was shewed besore, we shall see there, Moreover, these first words contain a tacit prophesic concerning the future calling of the Gentiles, and generality of the Church, to confit of all people and nations of the World; upon this ground, that God is the God and Creator of all men, as well as of the Jews and Ifraclites. The Apofle, 1 Cor. 12, 25, 28, circth thefe words to confirm his doctrine there, that we ought not to be ferupulous. about meats, because, if all Gods, (as made by him) then all theirs also, (for their use, s.c.,) that belong unto God; or, whose Godis; as some there; or rather; because none bad or evil in the control of the contro coats; as some there: or ratine; occause none use or evi in themfoleye, as screated all by God, and all owned by him, for his. But I think it more likely that the Apofile in citing thole words had refped unto Pfal. 50. 12. where we have the fane words a-gain. He context there hath more affinity with Saint Paul: his gain. The context there hath more amn fcope in that place, then the context here.

It is very likely that the Pfalmist doth allude to, and Rhetorically set out this peculiar ordinance and providence of God for man: wherein as much as in any thing, his great and foveraigne power over all things doth appeare. Founded therefore, not with regard to the nature of the Element of water, or first order of God in the creation : but founded, as it doth now appear to our eyes: elegantly and rhetorically to fer out the power of God. It is the greatest care of humane architects, to lay their foundations upon things very firme and sleady; as rocks, and the like; especially the foundations of great and bulky structures: but behold, here is an architect that hath founded fuch a Structure as the whole Earth, upon the waters, and yet it ftandeth. Wheth not lift up his foul natio vanity 3 That hath first his affections fer upon wealth, honour, pleasures, Jer. 22, 27. But about the right interpretation or translation of the Original word, there's the right interpretation of the Rabbins, or Jewish Dodors. The reading of most Hebrew, Copies is not "Wal his food; but "Wal my food. This being the most received reading of the two, hence the fool. This being the most received resuming or the two, nence the Rabbins inter, that it is God himselfer that greaterly, and would have five-string by God, or by the fool of God to be intended. The verb NOU will fix well enough for that purpole, we grant. And Jerem, § 1. 14. Amos 6.6, we read of Gods freeings by the (own) Joal. Yet we do not finded that it was a cultionar gauge, the Jewes, fo to fivear, by the life, or foul of God; which this interpretation prefuppofeth. But of fivearing neverthelese, though not by Gods, yet by a mans own foul, acco ding to the other reading, bis soal; the words may be taken, and are indeed, by most accurate Interpreters: who make the following words, nor fworne descrifuly, but an Epexegefis, or further interpretation, and confirmation of thele-Epexegens, or turtner interpretation, and communation of thele. This, because it pleafeth men of such worth and judgement; and is warrantable by the Original words, I cannot but like. However, this that we had before being no lesse warrantable, need nor be rejected. And certain it is, that there is nothing that more provokes a man often to fwear, then to fet his affection upon worldly

thy face, O Jacob] There is no more in the Hebrew then bare Faceb, without any O, which either should not be added, or with it omewhat elfe to make the fenfe perfect; as in the margin, O God of Jacob. But by others, it is otherwise supplied; as, the generation of Jacob; by fome: by others, that feel; thy face in Jacob. Therebe that leave Jacob alone in the Text; and read by it felie, Jacob; that leave Jacob alone in the lext; and read by it lefts, Jacob; as if he had faid, Who are (those that feel, thy face, &c? as before) the onely true posterity of Jacob; or, true Israelites. See the like, Pfal. 68, 26. from the fountain of Ifrael; or as in the margin there, ye that are of the fountain, &c.

V. 7. Lift up your heads, 0 ye gates 1 It was the fashion in ancient times, when they would solemnize the entrance of any Prince, or other, that had well deferved of the publick, or by way of flattery perchance, and more out of fear then good will; to breake down the wals, and pull off the gates of the City: partly, that the party in his triumphant Chariot, with all his train, might have the more free entrance; and partly, as protessing by that eremony, that their City needed no wals not gates, as long as it had such a Guardian and Proceedour within it. It is likely that David by these

words, doth allude to fome fuch cullom. words, and a minde to tome reen cutom, generalfying door] Heb. — W NTUM forme cranslate it, Particle (ii), or, mund: that is, yea doorst, or gates of the Worldt of the the doctors, mund: that is, yea doorst, or gates of the Worldt of the the doctors, which is the control of the Worldt of the Wo whom (according to this translation) the Psalmist doth invite, readily, and chearfully to embrace the truth of God, and fo to become members of his Church. Of this fomewhat hath been faid before, at the beginning. But the more generally (and more war-rantably) followed translation, is that we have here; according to which, the more literal fense is supposed to be this: David in great zeal intended a magnificent House to the God of Israel, and made preparations for it. He did not build it himselse we know; but yet he knew that his fon after him should, and therein according to his zeal much rejoycing and chearing himfelfe with the very thought of it, he fung this triumphant and ganulatory Ode, He cals them (the doors of this intended Holy Houle;) everlafting: partly in reference to Gods promife, expressed Pfal. 132. 14. 6 his eternal abode there; (of which see more upon Pfal. 68. 16.) and partly in opposition to the former Tabernacle, now upon the building of this Temple, to cease; and to the condition of the Ark, which in former times had been removed from place to place, till it was fettled in this House, from whence it never stirred afterwards, rill the destruction of the Temple it selfe. Some conceive this to have been lung by David, when the Atk was brought in by him to the place that he had prepared for it; as Pfal. 47. and 68. where fee more. In a more myltical fenfe, by these gates and doors here. are understood the fouls of the authul ; or of men in general, which are here exhorted to prepare themselves for the due entertainment of Ch ift, an his Golpel : to which not much unlike is camment or Ch. 115, an: his Golpel: to which not much marine, is that of the Prophet; lfa, 40, 5, applied to Chrift coming in the fleth, whereof the Ark was a type, Luke 3, 44, 5. The soice of me oping in the wilderness, Prepare 5 either may of the Lund, make his pathing in the wilderness. firaight. Every valley shall be filled, and every mountain and hill shall be brought low, &c. And again, in a mystical too, but different fence, the words by others, are applyed unto Christ, as directed to him after his refurrection, and glorious conquest of hell and the grave; now ready to ascend into Heaven: by gates, understanding the gates of Heaven.
